- Legacy System Enhancement
- Database Design and Development
- Data Management Solutions
- Interactive Dashboards and Portals
- Data Visualization Systems
- Reporting and Analytics Platforms
- Information Management Systems
- Systems Integration Services
- Cloud and Hosted Application Solutions
- Database Hosting and Administration
- Application Deployment and Maintenance
- User Training
- Technical Support Services
- Software Maintenance

Differentiators

- Extensive NASA and federal technology initiative experience.
- Full lifecycle design, development, hosting, maintenance and training.
- Transforms complex datasets into user-centric portals and reports.
- Operating since 1995 with nearly three decades of IT experience.
- Holds GSA Schedule GS-35F-0723V under SIN 54151S.

Past Performance

Porsche Club of America (PCA)

Date: 2010 - Current | **Value:** Average over 5 years \$250K

Details: Developed Gearbox, a customized Association Management System that streamlined membership operations, improved organizational efficiency and enhanced user experience for a large national membership organization.

NASA Earth Science Technology Office (ESTO)

Details: Created and maintains the ESTO Technology Portfolio system used to index, manage and track current and completed technology projects dating back to 2000.

NASA Career Path Program

Details: Designed and implemented a center-wide employee development and career planning platform used to support workforce growth and career progression management.

NASA Goddard Space Flight Center, Langley Research Center, Kennedy Space Center and NASA Headquarters

Details: Developed multiple mission-critical applications supporting proposal budget development, proposal evaluations, file generation and technology management activities used by scientists and researchers throughout NASA.
